

HID® WorkforceID™ Digital Credential Manager

Cloud-based management of your Workforce Authenticators

- Provides a complete Identity as a Service (IDaaS) solution including PKI certificate authority, credential management system, and high assurance multi-protocol authenticators.
- Manages the complexities of PKI so organizations can instantly provide PKI certificate-based authentication for their employees.
- Delivers a lower cost, more secure and easier-to-use solution compared to systems with complex password policies.
- Includes easy-to-use digital signature and encryption for emails and documents.
- Balances security and convenience by supporting a wide range of authenticators and form factors and the ability to manage and maintain secure access to corporate networks, data and applications.

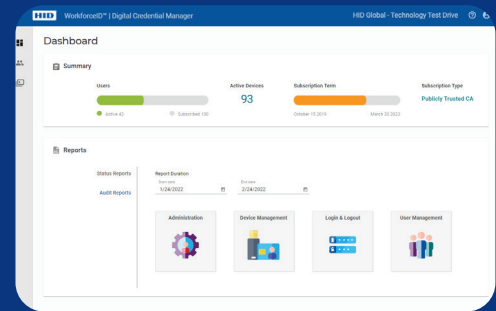

HID WorkforceID Digital Credential Manager ensures organizations comply with regulations like the General Data Protection Regulation (GDPR) by offering a solution that strengthens identity governance and risk management, automates enterprise identity and access management (IAM), and replaces costly complex password policies and legacy IAM systems with more secure and efficient authentication models. The solution provides a suite of services that manage the lifecycle of authentication devices and high assurance credentials, making it easy to create, manage and use digital credentials through

a cloud-based delivery model that manages the complexities of the public key infrastructure (PKI) and enables organizations to instantly provide trusted 2-factor certificate authentication for their users.

In addition, HID WorkforceID Digital Credential Manager simplifies the complexity of today's enterprise environments, often complex, hybrid heterogeneous systems spread across diverse locations, functions and architectures, by integrating with open standard protocols while supporting different authenticators to meet customer requirements and evolving security needs. These include smart cards and security keys with embedded secure elements for the highest level of assurance.

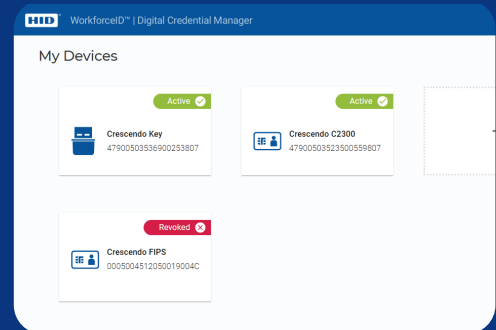

HID WorkforceID Digital Credential Manager enables more use cases than any other solution in the IAM market, including a converged badge that can be used to securely access the organization's facilities, in addition to their IT resources.

ADMIN PORTAL

Administrators can access a dashboard which provides a solution overview, and can generate status and audit reports to enable compliance and track events such as user authentication to WorkforceID Digital Credential Manager, device issuance and revocation.

END-USER PORTAL

End users gain visibility to their devices and certificates to be able to manage various functions, such as resetting a PIN, whether online or offline.

HID® WorkforceID™ Digital Credential Manager

HID WORKFORCEID DIGITAL CREDENTIAL MANAGER BENEFITS:

- Convenient 2-Factor authentication
- Lower password management costs
- Scalable cloud-based IDaaS
- Highly flexible choices for complex IT environments
- PKI certificate-based credentials
- Choice of publicly trusted or private dedicated Certificate Authority
- One-time password credentials for VPN applications
- Protection for cloud apps, VPN and Windows Active Directory

- **Zero Trust Security Model**
Protect network logon, VPNs, on-premise and cloud apps
- **Password Replacement Solution**
Replace passwords with digital certificates
- **Simple Deployment and Maintenance**
Enable deployment in under 30 minutes through cloud delivery, without the need for PKI experts
- **Future Proof Authenticators**
Manage the PIN of select FIDO2 authenticators
- **Flexible Authenticator Choices**
Mix and match authenticators to meet the needs of your heterogeneous user population
- **Compliance Fulfillment**
Comply with regulations and mandates with FIPS 140-2 certified authenticators
- **Advanced Capabilities**
Offers converged badge, digital signature with trusted identity, encryption and many more

Supported Authenticators	<p>Smart Cards:</p> <ul style="list-style-type: none"> • HID Crescendo® FIPS 144K (with optional PACS credential such as HID Prox®, iCLASS®, MIFARE®, Seos®)* • HID Crescendo 2300 (with optional PACS credential such as Seos, iCLASS, HID Prox and Indala Prox, MIFARE) <p>Security Keys:</p> <ul style="list-style-type: none"> • HID ActivKey® SIM with Crescendo® 144K FIPS* • HID Crescendo Key (NFC, USB-A and USB-C) • Yubico YubiKey 5
Certificate Authority	<ul style="list-style-type: none"> • Publicly trusted CA: HID IdenTrust TrustID, with digital certificates automatically trusted by Microsoft Windows, Apple iOS, macOS and Google Android • Private dedicated CA, with digital certificates only trusted by your organization
Authenticator Credentials	<ul style="list-style-type: none"> • With publicly trusted CA: Authentication, Digital Signature, Encryption Certificates Compatible with NIST FIPS 201 (Commercial Identity Verification) • With private dedicated CA: Authentication Certificate Compatible with NIST FIPS 201 (Commercial Identity Verification) • One-Time Password OATH credentials, authenticated with WorkforceID Authentication (available with Crescendo Key) • FIDO U2F and FIDO2 (available with HID Crescendo 2300, Crescendo Key and Yubico YubiKey 5)
Authenticator Compatibility	<ul style="list-style-type: none"> • ActivID® ActivClient® • Windows PIV Minidriver • Any PIV-compliant smart card middleware • Any FIDO-compliant application (available with HID Crescendo 2300, Crescendo Key and Yubico YubiKey 5)
User Management	<p>Integration with Organization's user directory:</p> <ul style="list-style-type: none"> • Azure Active Directory (cloud-based) • Active Directory with Active Directory Federation Services (on-premise)
Management Services	<ul style="list-style-type: none"> • Management portal for administrators: manage users and their devices (including device issuance, PIN unlock, device revocation) and access reports about the service • Self-service portal for end users: manage user's own devices (including device self-issuance, PIN reset, device revocation) • Compatible with Google Chrome and Microsoft Edge on Windows 10 x64 and higher, and Google Chrome on Apple macOS 10.15 and higher
